

MOBILE WEIGHING

Save time and money by weighing your product as you move it.

EFFICIENT

Weigh Forks are economically priced with low installation costs.

ROBUST

Each fork is equipped with its own battery module eliminating cable reels and power cords between the forks. The sealed rechargeable battery pack lasts over 1,000 charges.

SUPERIOR

Chisel tip forks with vibrant yellow inserts ensure that the driver can easily see the fork tips from above and below as they drive into the pallet.

ADVANCED

The Bluetooth® transmitters and calibration board are integrated into the forks to avoid risk of damage which means less downtime. Both forks communicate independently with the driver display.

Plug and Weigh.

The next generation in mobile weighing.

Weigh Forks Pro Series

Weigh and transport in one easy step. The completely wireless system installs in minutes for weighing on the go and can be used in combination with Cascade Fork Positioners and Rotators. Scale components are easily accessible and digitally calibrated.

Weigh Forks Logistics Series

Featuring a thinner profile than standard the Pro Series, Weigh Forks Logistics Series fit into the fork pockets of standard GMA pallets and other pallets that require a thinner fork. Perfect for trailer applications.

Order Picker Weigh Forks

Custom designed to fit your specific order picker truck. Provides the ability to utilize all the features of our Weigh Forks Pro Series.

THE FIRST OF ITS KIND: One innovative attachment with the power of three.

A combined Weighing Carriage, Sideshifter and Fork Positioner provide multiple operational benefits into one sleek patented design.

Don't need all three? The ActivWeigh carriage model is available singularly with sideshifting or fork positioning as additional options.

RELIABLE

Proven Cascade K-Series Fork Positioner with common components provides greater reliability and longevity.

VISIBILITY

Excellent visibility window helps improve operator efficiency and reduce product damage.

ALL-IN-ONE DESIGN

This patented design provides greater versatility. Weighing, Sideshifting & Fork Positioning combined within a single integral unit. Allows for easy installation and connection.

Includes:

WEIGH-IN-MOTION

Operator can engage a load and start transporting immediately, without delay. Weight data is automatically recorded during transport. **Weight does NOT need to be centered to attain an accurate reading.**

CERTIFIED

NTEP Legal for Trade certification option fulfills legal needs for operations where products are sold by weight.

Display Indicator
With bright backlit display and independent communication as standard, however, optional data communication to truck Telematics is possible.

...Cascade has the solution in one sleek, clean design.

► **Mast Carriage, Hang On Scale & Hang-On Sideshifting Fork Positioner**

► **Integral Weighing Carriage w/ Hang-On Sideshifting Fork Positioner**

► **A fully Integrated Integral-Weighing Sideshifting-Fork Positioner**

Cascade's Solution

Minimal Effective Thickness (ET) is on average 3" (76mm) less than competitive weighing carriage models, which helps maximize net capacity of the lift truck while reducing aisle width requirements and improving maneuverability for the end user.

Mobile weighing increases productivity and efficiency.

Checking Incoming Goods

Check incoming goods while they are being offloaded from the freight truck. If an incomplete delivery is identified, you can react on the spot to prevent stock differences and interrupted production processes.

Preventing Picking Errors

Weighing on order picking trucks helps prevent picking errors: if you know your article weight, you can use that weight to determine whether the right amount of a particular article has been picked. (Note: Piece counting feature is not legal for trade.)

Filling, Mixing and Dosing

Accurate filling of drums, containers and big bags means there is no unnecessary loss of material. By weighing the containers during transport on a forklift, you achieve higher efficiency and flexibility in your filling processes.

Preventing Overloads

Avoid the expenses and dangers of overloading freight trucks or warehouse racks. Mobile scales weigh every pallet as they are loaded to ensure the recommended weight is never exceeded.

Waste Control

Monitoring waste flows and knowing how much waste is produced at each point in the production line, is the first step towards controlling and minimizing waste.

Shipping

Every company that ships goods needs to know the weight of these goods as accurately as possible. The sender is required by law to declare the correct weight on the shipping documents. Determining shipping weights is probably the most common use of a mobile scale.
